EDUCATION

New York University

B.S in Computer Science | GPA: 3.76/4.0

Abu Dhabi, UAE | New York, USA

Aug. 2020 – May 2024

EXPERIENCE

TikTok (ByteDance)

Dubai, UAE

Data Analyst

Aug. 2024 – Present

- Conducted Shapley value analysis on large-scale datasets to identify cost drivers, translating complex data into a product roadmap initiative with **projected annual savings of >¥2M**.
- Independently owned and scaled a high-precision **demand forecast model** across 18 global regions, utilizing machine learning and seasonality algorithms to achieve a 93.2% accuracy rate.
- Built the end-to-end performance evaluation logic for the “ByteCanteen Meal Release” feature; designed dashboards to track waste reduction and **KPIs**, enabling operations to pinpoint high-waste groups.
- Partnered with Finance, Product, and IMS teams to deliver scenario-based analyses on “abnormal behaviors,” directly influencing **global policy changes** and improving **organizational compliance**.
- **Engineered automated pipelines** to resolve complex backend geographic mapping and permission bugs, ensuring 100% reporting accuracy for leadership during large-scale organizational restructures.

Product Analyst Intern

June 2023 – June 2024

- Developed an ML-driven RFM clustering framework to identify client revenue-growth opportunities, reducing manual analysis by 80% and enabling targeted sales strategy.
- Built a real-time automated dashboard for CPG client success metrics, replacing manual workflows and improving operational visibility.
- Produced granular revenue forecasts for TikTok’s 2024 business (by product and department), supporting precise financial target-setting.
- Rebuilt the product analytics master dashboard, standardizing revenue insights across teams and streamlining business review processes.

New York University

Abu Dhabi, UAE

Machine Learning Research Assistant

Apr. 2023 – Sep. 2023

- Built an integrated smart-healthcare system for Alzheimer’s patients, combining an LLM-based dialogue model, neural-voice synthesis, and animated avatar generation in Python.
- Co-authored and published a [research paper](#) at ML4H 2023, QUQA, and the NYU AI Workshop.

PERSONAL PROJECTS

[Scene-level movie data from Amazon X-Ray in the US market combined with IMDb](#): published data paper
[AMAN](#): crisis-response platform (using quantum ML) for emergency service & real-time safe-zone routing
[Political Preference Prediction Model](#): ML research paper that predicts political views of tweets
[Oscar-Winning Film Trend Overview](#): text-data analysis on shifts of Oscar-winning films content over time
[Proximity](#): business model designed from scratch that connects student-run businesses and local community

SKILLS

Programming: Python, SQL, Hive, Spark, R, CSS/HTML

Tools: MS-Excel, Tableau, Figma, MongoDB
